

Slide 1 – Mission & Vision

Mission

Engineer resilient, intelligent, and scalable systems that bridge technology, people, and business impact. Combine deep technical expertise with strategic leadership to deliver solutions that make complex systems reliable, efficient, and future-ready.

Vision

Be recognized as a transformative technology leader shaping the future of reliability engineering and AI-driven innovation—building platforms, strategies, and teams that solve today's challenges while creating sustainable value for tomorrow.

Slide 2 – Personal Brand & Values

Personal Brand Statement

I am a transformative SRE and technology leader who builds resilient, intelligent systems that make AI and software reliable, scalable, and safe. I bring clarity to complexity, turn innovation into dependable platforms, and create lasting value for organizations and the people who depend on them.

Core Values (US Navy)

- **Honor** – Integrity and accountability in all actions.
- **Courage** – Boldly leading teams through uncertainty and innovation.
- **Commitment** – Dedication to excellence, reliability, and long-term impact.
